

What were this instructor's main strengths?

Comments
–nice professor –exams were challenging but not impossible
Very smart
Organized in his teaching style and grading fairly
Explained things in a simple, straightforwards, logical way.

How might this instructor improve their teaching effectiveness?

Comments
–talked at us instead of to us –add more areas for participation since it is 10% of our grade –never gave class exercises so to improve there should be practice problems in class
kind of a boring subject with a lot of notes
The instructor should be more enthusiastic and motivated instead of just reading the PPT
Homework problems were not very useful for exam prep
